Scope of Work

List out the most common pages that a website for any client would have, then ask them about their Value Proposition and model the remaining pages around it.

Common Pages

- Homepage/Landing page
- Auth pages:
    - Register
    - Login
- Terms of Service(Terms & Conditions)
- Privacy Policy
- About Page
- Contact Us form

Pages Depending on niche of the client

- E-commerce pages
- LMS pages
- CMS pages

The about pages differ from each other depending on the type of sector the client's business operates in.

Idea Dump:
This is when you throw in any and all ideas you or the client has about how the app should behave or look.

Creative Brief:
if you are a solo developer, then this _____
needed as much but in a team, then y_____
translate the crude discussions you h_____
into Functional Requirements, No_____
Requirements and Restric_____

Scope of work:
A very important step where you out_____
the entire project from start to finish_____
respective deadlines then you prese_____
for discussion and possible revision._____
contract that tells the client what to_____
deadline and this also helps to p_____
discrepancies down the line when t_____
some new feature but didn't add it the_____
this scope and charge them money or communicate
that the new feature will bring about delays. It's a
Safeguard for you the developer

Discovery

1. Idea Dump
2. Creative Brief
3. Scope of Work
